

Hello,

The club I run has been using your app for a little over a year now, having used it first at a few matches I attended in Florida. While I was hesitant at first (Apple and I have a strong dislike for each other) I bit the bullet and gave it a try.

Overall, we have been very happy with the program and the updates you have been doing have fixed several of the things I had thought about as well. I am sure we are not using the program at its full potential, but what we have been using has been excellent, and I continue to learn more about its capabilities with each match.

In your latest update, Version 1.46.1, you modified the report for the Clean Match awards so that it printed in Alphabetical Order instead of Overall Finish, which was perfect!

My question for you; Is it possible to also output the Dagnabbit Awards in Alphabetical Order? Not that those competitors typically finish in the top 10, but it would be convenient when we are reading the awards.

Thank you for your excellent program,

Dogmeat Dad aka Chuck Limparis - Match Director
